

Hubspot

This integration requires the following information provided to Dstny

- **Private app API access token:** *(String of letters and numbers generated by Hubspot admin)*  

· To configure a Private App, the user needs to be a “super admin”.
- In your HubSpot account, click the **settings icon** in the main navigation bar.
- In the left sidebar menu, navigate to **Integrations > Private Apps**.
- Click **Create private app**.
- On the *Basic Info* tab, configure the details of your app:
  - Enter your app's **name**.
  - Hover over the placeholder logo and click the **upload icon** to upload a square image that will serve as the logo for your app.
  - Enter a **description** for your app.
- Click the **Scopes** tab.
- Select the **Read** checkbox for the **Crm.Objects.Contacts** scope.
- After you're done configuring your app, click **Create app** in the top right.
- In the dialog box, review the info about your app's access token, then click **Continue creating**.
