Zendesk

This integration requires the following information provided to Dstny

- **Username:** *(a username of a user with access to read/see contact information)*
- **Token:** *(a string of letters and numbers generated by Zendesk admin)*
- **RemoteUri:** *(the adress to the Zendesk instance with /api/v2 added at the end in the format https//unique_subdomain.zendesk.com/api/v2)*
- **WebUri:** *(the adress used to access the Zendesk instance in the format https//unique_subdomain.zendesk.com)*

Creating and managing API tokens

1. In Zendesk Admin Center, click the Apps and integrations icon in the sidebar, then select APIs > Zendesk APIs.
2. Make sure the **Settings** tab is selected.
3. To create a token, click the **Plus** (+) icon on the right side.
4. To delete a token, click the token in the list, then click **Delete** on the right side.
