

Odoo

This integration requires the following information provided to Dstny

- URL: *(the address used to access the Odoo instance in the format <https://odoo.com>)*
- Database: *(the Odoo database to use - for the hosted Online version of Odoo this is usually the first part of the domain name in the URL)*
- Username: *(the username, an email address)*
- Password: *(password or API key from Odoo)*

API keys can be created from the user Preferences in Odoo.
